

## BI Developer - Intern

### Play a major role in growing Australia's most innovative health startup

Kinela is on a mission to radically change healthcare for people with disabilities and older Australians—giving them the tools to live happier, healthier and more independent lives. Through affordable, convenient and nutritious meal-delivery services; and innovative allied health programs (including dietetics, speech pathology and occupational therapy); Kinela supports thousands of customers across Australia to achieve their health and wellbeing goals.

As a certified B Corporation business, and a registered provider in the National Disability Insurance Scheme (NDIS), Kinela is considered an innovative leader, and industry disruptor, in driving significant positive impact for the disability community.

### The opportunity

In this exciting internship opportunity, you will be responsible for the development of Kinela's analytics dashboard with key performance metrics to assist the business in making high-performance, data driven decisions - across multiple functions including: sales, operations, marketing and finance.

### Learning opportunities

Analytics skills:

- Industry standard of KPI measurement
- Analytics best practices
- Data visualisation techniques
- Statistical analysis
- Data blending and calculation

Tools:

- Salesforce Sales Cloud
- Analytics platform like databox, Klipfolio, Tableau (TBD)
- Google Analytics

Technology:

- SQL
- Salesforce query language
- Object oriented programming

### Benefits

- Being part of the journey to build a unicorn in the health space
- True ownership, real responsibilities and great opportunities to grow
- Flat hierarchies and a great team spirit
- A for-purpose work culture with a fun, friendly team and supportive environment
